Roadside Geology of Maryland, Delaware, and Washington, D.C.

John Means
Illustrated by Matthew Moran and Suzannah Moran

Explore the rocks inside and outside of the Beltway with the latest addition to the Roadside Geology series. With this book as your guide, learn why sea level is rising faster in Chesapeake Bay than elsewhere, find out about the sixth largest impact crater on Earth, and discover what moved the rocks at Devils Racecourse in Catoctin Mountain Park.

368 pages, 6 x 9, paper \$24.00
ISBN 978-0-87842-570-9

The MIT Press

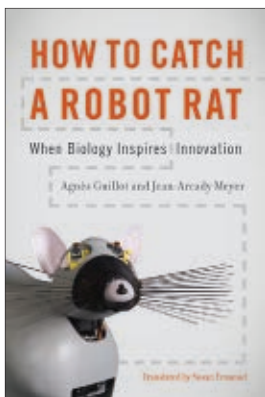

Atlas of Science

Visualizing What We Know
Katy Börner

"Science is a voyage of discovery and Katy Börner has provided its first atlas. This excellent book offers a compendium of all that is best in explaining visual maps of our scientific knowledge." — Michael Batty, University College London, author of *Cities and Complexity* (MIT Press)

288 pp., 500 color illus., \$29.95 cloth

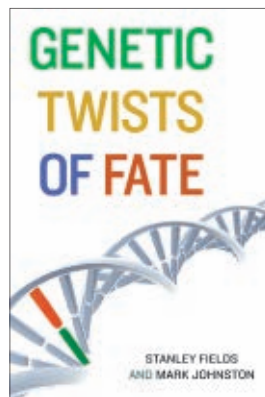

How to Catch a Robot Rat

When Biology Inspires Innovation
Agnès Guillot and Jean-Arcady Meyer
translated by Susan Emanuel

"Guillot and Meyer have been both intellectual and organizational leaders in this field, and in *How to Catch a Robot Rat* they carefully document the history and intellectual currents of the field." — Rodney Brooks, MIT

232 pp., 103 illus., \$29.95 cloth

Genetic Twists of Fate

Stanley Fields and Mark Johnston

"We really need a book that engages the public in the genetics debate and gives scientists a handy companion in this vital dialogue. The signature personal stories in this book provide a remarkably fresh, engaging, and memorable experience." — George M. Church, Harvard Medical School, founder, Personal Genome Project

240 pp., 45 illus., \$24.95 cloth
